RDA Software Preparation for Dual Polarization, Software Note 84

This document provides instructions to backup RDA adaptation data and perform the RDA Security Scan. Instructions are also provided for NWS and DoD sites to load RDA Build 12.0 Remote Access Software.

Approximate downtime will be 0.5 hours for Attachments 1 and 2 (before Dual Polarization installation) and 0.5 hours for Attachment 3 (after Dual Polarization installation) for DoD and NWS sites.

Software Note 81, RPG Support Media for Dual Polarization, accompanies this software note in the Dual Polarization Software Preparation Kit. Software Note 81 must be completed on the RPG while the RDA is shut down for installation of Dual Polarization at the site.
